(54) Title: DIAGNOSTIC AND THERAPEUTIC USE OF A SULFOTRANSFERASE FOR NEURODEGENERATIVE DISEASES ✓

Verification of differential expression
of SULT4A1 splice variant 1 and/or
splice variant 2 by quantitative RT-PCR

(57) Abstract: The present invention discloses the differential expression of a cytosolic sulfotransferase in specific brain regions of Alzheimer's disease patients. Based on this finding, this invention provides a method for diagnosing or prognosticating a neurodegenerative disease, in particular Alzheimer's disease, in a subject, or for determining whether a subject is at increased risk of developing such a disease. Furthermore, this invention provides therapeutic and prophylactic methods for treating or preventing Alzheimer's disease and related neurodegenerative disorders using a gene coding for SULT4A1. A method of screening for modulating agents of neurodegenerative diseases and recombinant animal models are also, disclosed.
